

Project Design Phase-II

Data Flow Diagram & User Stories

Date	01 October 2026
Team ID	SWUID2026355656
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) provides a visual representation of how information flows through our Smart Inventory System. A clear DFD effectively communicates system requirements visually. It highlights external entities (data sources/destinations), processes that transform data, and data stores.

- Example: (Simplified) - Smart Inventory System
 1. Store Manager configures inventory alerts and logs into the system.
 2. Manager inputs new stock data (Supplier, Quantity, Item).
 3. System processes and stores data in the Inventory Database.
 4. Low stock levels trigger automated reorder requests to Suppliers.
 5. Real-time stock levels are visualized on the Manager Dashboard.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority
Store Manager	Authentication	USN-1	As a Store Manager, I want to securely log into the system using my employee ID and password.	Successful login redirects to dashboard	High
Store Manager	Authentication	USN-2	As a Store Manager, I want to reset my password if I forget it via email link.	Password reset email received and link works	Medium
Store Manager	Inventory Management	USN-3	As a Store Manager, I want to add new product shipments to the database.	New items reflect in total stock count	High
Cashier	Sales Processing	USN-4	As a Cashier, I want to scan barcodes to quickly deduct sold items from inventory.	Scanned item immediately reduces stock by 1	High
Administrator	System Config	USN-5	As an Admin, I want to set minimum stock thresholds for automated alerts.	Alert triggers when stock hits the threshold	Medium
Supplier	Order Fulfillment	USN-6	As a Supplier, I	PO email sent	High

			want to receive automated purchase orders when stock is low.	automatically with correct details
