

Ideation Phase

Empathize & Discover

Date	01 October 2026
Team ID	SWUID2026355656
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Library User (Student) Empathy Map Data:

Think & Feel: "I hope the book I need for my assignment is available.", "I feel anxious about accumulating late fees.", "I want a quiet, hassle-free environment."

Hear: "Classmates saying the library is always out of core textbooks.", "Professors recommending specific reference books.", "Friends complaining about the manual fine payment process."

See: "Long queues at the checkout desk.", "Disorganized shelves.", "Outdated digital catalog PCs that are hard to navigate."

Say & Do: "Asks the librarian for help finding a book.", "Spends 20 minutes manually searching the aisles.", "Forgets to return the book on time because there is no reminder."

Pain: Wasting valuable study time searching for books, paying unnecessary late fines, and uncertainty about book availability.

Gain: Quickly finding and reserving books online, getting automated WhatsApp/Email reminders before due dates, and a seamless, fast checkout process.
