Team ID	SWUID2026355656
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Problem-Solution Fit Canvas 2.0

1. CUSTOMER SEGMENT(S) Who is your customer?	University students, faculty members, and library administrators (Librarians).
2. JOBS-TO-BE-DONE / PROBLEMS What problems do you address?	Students/Faculty: Finding specific books quickly, keeping track of borrowed books and due dates. Librarians: Managing inventory, tracking issued/returned books, calculating late fees efficiently.
3. TRIGGERS What triggers customers to act?	Upcoming exams or assignments requiring research materials; receiving a late fee notice; manual inventory audits taking too much time.
4. EMOTIONS: BEFORE/AFTER	Before: Frustrated (can't find books), anxious (forgetting due dates), overwhelmed (manual tracking). After: Relieved, organized, confident, and efficient.
5. AVAILABLE SOLUTIONS What are they using now?	Manual card catalogs, basic Excel spreadsheets, physically walking through aisles. (Cons: Slow, prone to errors, no remote checking availability).
6. CUSTOMER CONSTRAINTS	Limited time between classes, lack of physical access to the library during off-hours, budget constraints for paying accumulated late fines.
7. BEHAVIOUR What do they do to address it?	Asking librarians for help constantly, wandering aisles to find books manually, borrowing notes from peers instead of library books, frequently paying fines.
8. CHANNELS of BEHAVIOUR	8.1 ONLINE: Searching college forums, WhatsApp groups for PDF versions of books. 8.2 OFFLINE: Visiting the library help desk, searching physical shelves, asking professors.
9. PROBLEM ROOT CAUSE	Outdated legacy systems, lack of a centralized digital database, poor real-time tracking of physical assets, and absence of an automated notification system.
10. YOUR SOLUTION	A comprehensive Smart Library Management System featuring real-time catalog search, automated due date reminders via email, online book reservations, and a digital admin dashboard for inventory management.
