

Project Design Phase-II

Data Flow Diagram & User Stories

Date	01 October 2026
Team ID	SWUID2026355656
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) provides a visual representation of how information flows through our Library Management System. A clear DFD effectively communicates system requirements visually. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified) - Library System Flow

1. Member accesses the Library Portal and authenticates credentials.
2. Member queries the catalog for a specific book or author.
3. System retrieves availability status from the Inventory Database.
4. Extracted data confirms the book is available, and an issue request is processed.
5. The transaction is visualized in the Librarian's UI, and a confirmation is emailed.

User Stories

Use the below template to list all the user stories for the product.

User Type	Epic	USN	User Story / Task	Acceptance criteria	Priority	Release
Member	Registration	USN-1	As a member, I can register by entering my details.	Can access account	High	Sprint-1
Member	Registration	USN-2	As a member, I get a confirmation email.	Email received	High	Sprint-1
Member	Search	USN-3	As a member, I can search for books by author.	Results display correctly	High	Sprint-2
Librarian	Inventory	USN-4	As a librarian, I can add new books to catalog.	Books appear in catalog	High	Sprint-1
Librarian	Issue	USN-5	As a librarian, I can issue a book to a member.	Status changes to Issued	High	Sprint-1
Admin	User Mgmt	USN-6	As an admin, I can view all active users.	List of users is visible	Medium	Sprint-2
